

About Your New Cable Modem and CD

Please fill out the information in the table below before you begin installing your new cable modem. Your cable service provider needs this information to ensure that your modem connects to the Internet successfully.

Cable Modem Product Name & Model No.

Zoom Model 5011

S/N

(on modem's bottom label)

Cable Modem MAC Address

(on modem's bottom label above small bar code)

Ethernet ID

(on Macintosh case label)

Note: If your Mac is missing its Ethernet ID label, please refer to your Global Village Cable Modem User's Guide for assistance, either the printed version included with your modem package or the PDF version included on the CD.

Using Your Cable Modem CD

Your Global Village Cable Modem comes with a CD of complimentary software. In addition to user documentation and FAQs, the CD includes the following:

- **Norton's Personal Firewall**
- **Norton's AntiVirus Software**
- **Lemke's Image Editor**
- **iView's Multimedia Media Manager.**

To install these programs, follow these steps:

- 1** Insert the Global Village CD into your Mac's CD-ROM drive. (If the CD doesn't open automatically, double-click on its desktop icon.)
- 2** The **Global Village CableModem CD** folder appears. Double-click on the **Global Village CD Installer** icon.
- 3** Choose which application you would like to install, and click the appropriate button.
